BILAYER TABLET OXOBROM 20 gr

DESCRIPTION

Bilayer tablet that combines Potassium Monopersulfate (fast dissolving) and BCDMH (slow dissolving). In this way, shock and maintenance treatment are obtained in the same tablet, which is also free chlorine

It doesn't cause unpleasant odors typical of formulations containing chlorine

Besides, Potassium Monopersulfate increases the efficiency of BCDMH, because it reacts with the bromide ions becoming them in hypobromous acid again, the active disinfectant of the BCDMH once this is dissolved in water

CHARACTERISTICS

- **Physical State:** Solid
- **Appearance:** Bilayer white and blue tablets
- **Odor:** Practically undetectable

INSTRUCTIONS FOR USE AND DOSAGE

Add tablet enough to obtain the desired quantity of free bromine dissolved in the water:

- 2-4 mg/liter for public and indoor swimming pools, and private spas.
- 3-6 mg/liter for public spas

COMMENTS

- Water pH values recommended are between 7,2 and 7,6. However, this product allows a wider range of pH values (between 7 and 8) without losing any efficiency disinfectant.
- The almost total absence of odors and total absence of chloramines which cause irritation in eyes makes this product perfect to be used in spas and indoor pools.

PACKAGES

Packages from 1 Kg to 50 Kg.

Different possibilities can be studied in a personalized way
